

Aqua Cooler Showcases Its Most Popular Model at Aus Drinks 2008

Aqua Cooler Pty Limited, Australia's largest water cooler and drinking fountain manufacturer will be showcasing its standout performers at this year's AusDrinks Exhibition. Held every 2 years, the AusDrinks Exhibition is the perfect venue for Aqua Cooler to introduce its broad range of "world class" products and services to people involved in the bottle water industry. With over 62 years experience in manufacturing quality refrigerated appliances Aqua Cooler is well poised to cater to the needs of all water business. Not only does Aqua Cooler sell water coolers - they service them, provide ongoing support for spare parts, and they have a refurbishment facility to prolong the life of each product. "This year we want to highlight our most popular water cooler" Aqua Cooler's Marketing Coordinator, Talia Prior said, adding "Our number one focus has always been on producing high quality Australian Made water coolers for our clients. And since our coolers are made in Australia, there is also that full back up support of local spare parts and service. Feedback from many customers has indicated that a lot of the cheaper imported water coolers are not generally supported in the marketplace, and that causes undue frustration". Among the displays, Aqua Cooler will be featuring the new upgrade of its Titanium cooler which now sports a smart looking black drip tray and black taps, seamlessly complimenting the dark titanium looking cooler body.

The Aus Drinks 2008 Exhibition will be held from the 18th – 20th May at the Sheraton Mirage Resort & Spa on the Gold Coast in QLD. Aqua Cooler will be exhibiting at Stand 15.
