

14th MARCH 2007 AQUA COOLER LAUNCHES ITS NEW TRI-STAGE FILTER BOTTLE

Aqua Cooler is proud to announce the launch of its new Tri-Stage Filter Bottle. Designed to be used with a normal bottle cooler, the Tri-Stage filter bottle is an inexpensive filtration system which allows you to enjoy filtered water with the convenience of a bottle water cooler. Designed to suit any Aqua Cooler Bottle Water Cooler, this new Tri-Stage Filter Bottle is the smart way to have clean, pure, filtered drinking water.

Technical information includes:

FLOAT ASSEMBLY

The slim line float assembly at the base makes the filter bottle compatible for all Aqua Cooler Bottle Water Coolers

FILTRATION COMPONENTS

The Tri-Stage filter is composed of an activate carbon block, corallite and a ceramic dome, each stage containing natural sediments and minerals uniquely designed to reduce impurities in the water including chlorine, odour, rust, microbes and many others.

FILTRATION PARAMETRES

Activate Carbon – 0.3 millimetres

Corallite – 20-40 millimetres

Mineralization – Release microelement

Ceramic Dome – Micron rating is 10-55 microns

FILTRATION CAPACITY

The filter cartridge is certified for 2000L and it is recommended that filters are replaced every 3 months.

BOTTLE CAPACITY

The C-155 filter bottle is able to hold up to 8 litres of water.

DIMENSIONS

Width - 315 mm

Depth – 315 mm

Height – 340 mm

WEIGHT

Gross – 3 kg

Net – 2.3 kg
